

Features:

- With ART-System (Automatic-Reset Test) With dry-running, the system stops automatically and re-starts automatically in periodic cycles
- Automatic recovery of system settings after a power failure
- Protection from wrong connection and overcurrent.
- Protection from short-circuit.
- Control panel with LCD-display
- Installation on pump motor (adapter required).
- Floating contact for alarm transfer
- Internal voltage sensor with real-time indication on display
- Operating data recording: Operating hours, re-starts and number of mains cut-offs.
- Alarm memory Type and number of alarms
- Frequency range: 15 - 48 Hz
- Differential pressure: 0.2 - 1.5 bar
- Control pressure: 0,5 - 10 bar or 0,5 - 16 bar (depending on built-in pressure sensor - Standard 0,5 - 10 bar)

Application:

- Frequency-controlled control units for vertical pumps
- Control unit for single pump or double pump combined in master-slave mode.

Scope of delivery:

- Including external pressure sensor installed in the pressure line.

Technical data:

Art.no.	U [V]	L [mm]	W [mm]	H [mm]	Weight [kg]
20647	400	167	118	257	3,5

Product benefits:

- Dry-run protection
- Alarm recording
- Auto-reset function
- Intelligent cooling control
